

CYLINDERS TO TURN DOCTOR BEAM

Benefits

- Turnbuckle construction to position doctor blade precisely on a roll's surface without unfastening a cylinder
- Automated locking function at the end positions as an option
- Takes just one 5/2-valve to operate even with the lock

TECHNICAL DETAILS

Cylinder diameter	∅ 100 mm and ∅ 125 mm, standard strokes 30, 50 and 100 mm
Eye distance adjustment	± 20mm
Custom strokes	available on request
Max. Temperature	+150°C (302 °F)
Locking force	20 kN exceeds max. thrust force
Materials	Available in aluminium and stainless steel
