

ISO 15552/VDMA 24562 CYLINDERS - AIRTAC SAI

SAI SERIES

BENEFITS

- ISO15552 standard cylinder.
- The piston seal is composed of two Y-shape one-way seal structure, which has compensation function, long service life and low start-up pressure.
- The aluminum barrel without tie rod has good corrosion resistance. With sensor switch groove on the two sides of body.
- The buffer adjustment of cylinder is smooth and steady; Cylinders and accessories for installation with several specifications are optional.

TECHNICAL DETAILS

Bore size	32, 40, 50, 63, 80, 100, 125, 160, 200 mm
Fluid	Air (to be filtered by 40 µm filter element)
Operating pressure	1,5-10,0 bar (22-145 psi)
Temperature range	-20-+70°C
Materials	Piston rod - Carbon steel with 20 µm chrome plated or Stainless steel Front cover - Aluminium alloy Back cover - Aluminium alloy Screw - TPU
