

GAFR FILTER & REGULATOR

GA SERIES FILTER & REGULATOR

Benefits:

- Pressure and flow balanced pressure adjustment mechanism
- The pressed-in self-locking mechanism can prevent the abnormal movement of the set pressure caused by external interfere
- Unique diversion structure spins the air flowing through to effectively separate the liquid from the air and reliably filter the solid grain.
- The filtering grade includes 40 µm and 5 µm (optional)
- Two drain types are available: semi-auto drain and automatic drain.
- Three material of bowl are available: PC, Nylon and metal.
- In addition to panel installation, the bracket is optional for installation
